THERMOSKIN ®

A Weathershield and Protectant for all Shorn Animals

Benefits:

1. Helps protect shorn sheep from the chilling effects of wind and wet in the post-shearing period up to 6 weeks after shearing
2. Reduce the potential of loss in body weight and condition during the period from shearing to 6 weeks thereafter
3. Reduces mortality numbers from inclement weather
4. Protects and seals minor shearing cuts and nicks
5. Will promote faster healing and reduce contamination
6. Assists with maintaining constant body temperature
7. Dries within 2 minutes of application
8. Sheep can be exposed to rain 10-15 minutes after application and it will not affect the efficacy of the product
9. Physiologically harmless
10. Biodegradable
11. Environmentally friendly
12. Thermoskin®. can easily be scoured
13. Contains natural ingredients, including lanolin
14. Can be used directly with solvent based treatments NOT WATER BASED.
15. If using Water Based Treatments they must be totally dry on the animal before treating with Thermoskin®
16. Will not produce residues that are likely to adversely affect the environment through scouring plant effluent
17. A weathershield for all shorn animals
18. Exempted for registration by both the Australian APVMA and NZ ACVM
19. Is sprayable through either the Thermoskin Portable Automatic Spray System or by using a spray gun
20. Is an extremely fast way of protecting sheep after shearing
21. Cost effective at around \$1.30 per head +GST

What is THERMOSKIN.®

Thermoskin® is a liquid that is sprayed on to all shorn animals especially sheep to assist in the prevention of Hypothermia and is based on lanolin.

Why chose THERMOSKIN.®

Thermoskin® applied to sheep gives a minimum of up to 6 weeks protection to the effects caused by wind and rain

Thermoskin® can be applied to all ages and breeds of sheep

Thermoskin ®can be applied to all shorn animals

Only require up to 50 mls per animal

No need to put on a coat on the sheep after shearing

Reduces the loss of condition and body weight of the sheep

Most animals treated with Thermoskin® gain substantially more weight than untreated animals

Is physiologically harmless

Does not damage or affect the wool

Is scourable using existing methods

Does not block the pizzle, anus or vulva of the animal

Is biodegradable

Cost effective

Developed and Manufactured in Australia

Thermoskin®

Is an insurance to protect the sheep from inclement weather in the first 6 weeks after shearing

If using the Thermoskin Portable automatic spray system it only takes 1-2 seconds per animal

Thermoskin has been trialled at studs and commercial properties from Woolbrook, Eden Monaro, Yass, Highlands of East Gippsland , Dunkeld and Alexandra NZ
